

Yash Suryawanshi
B.com In Computer Application
D.P Chaturvedi College
Seoni (M.P) India

Date of Birth 20/10/2002
Email ysuryawanshi941@gmail.com
Contact Number 8839548073

Education Qualification:

Year	Degree/Qualification	Institution/Board	CGPA/Percentage
2020-2023	B.com In Computer Application	Raja Shankar Shah University	Pursuing
2020	Class XII	CBSE	67%
2018	Class X	CBSE	52%

Project Work:

- **Personal Portfolio:**

Building a portfolio website can teach important skills related to project management, such as setting clear goals, breaking down tasks into manageable pieces, and staying organized throughout the development process. Overall, building a portfolio website is a great way for front-end students to gain practical experience and develop key skills that will be useful throughout their careers.

- **Forkify:**

It is a recipe search and bookmarking application that allows users to search for recipes by entering ingredients or keywords. Once a recipe is selected, users can view the ingredients, instructions, and nutritional information. They can also save the recipe to their bookmark list or add it to their shopping list. The project is built entirely with JavaScript, HTML, and CSS, and utilizes modern web development tools and libraries such as the Webpack module bundler and the Axios HTTP client library. The application is also integrated with the Food2Fork API, which provides access to a vast database of recipes.

- **Mapty:**

It is a workout tracking application that allows users to record their workouts on a map and keep track of their progress over time. The app utilizes the Geolocation API and Mapbox to display the user's location on a map and record their work out details. Users can select from various workout types, including running, cycling, and swimming, and add additional details such as distance, duration, and calories burned. The app also includes a feature to save and display the user's workout history, including a summary of all their workouts and a detailed breakdown of each session. The project is built entirely with JavaScript, HTML, and CSS, and utilizes modern web development tools and libraries such as the Webpack module bundler and the Leaflet map library.

Technical Skills:

- **Programming Languages:** JavaScript, Core Java, SQL, Node.js, React.js (Library), HTML, CSS
- **IDE:** Visual Studio Code, IntelliJ IDEA, Eclipse, Atom, Sublime
- **Other Software:** MS-Office
